

Introducing the Kaiser Moment Frame Connection

The Kaiser Moment Frame (KMF) is a smaller version of our prequalified Kaiser Bolted Bracket special moment frame designed for easy Ordinary Moment Frame construction.

- Ideal for light-frame structures (wood or steel stud)
- Fits within a standard 6" stud frame
- Easy bolted installation eliminates field welding
- Unlike the competition the KMF eliminates all custom fabrication
- Use on HSS or Wide Flange frames
- Uses standard steel sizes with your design specifications
- Technical support and sizing calculation spreadsheet provided
- The base of the frame utilizes the Kaiser Bolted Base – an easier base plate installation.
- Use in seismic retrofit of soft story buildings

Procedure:

- Design required frame size
- Use spreadsheet to select standard steel sizes of your design
- Purchase KMF brackets with bolts
- Prepare in your fabrication shop
- Install bolted connection in the field
- Save on installation, shipping costs, and time
